Stallion's Name:

Total Volume of Dose: \_\_\_\_\_ mL

Total Sperm in this Dose: 750<sup>6</sup>

Extension Protocol: 25<sup>6</sup> Progressively Motile Sperm/Extended mL

Extender: Next Generation<sup>®</sup> Universal<sup>™</sup> w/Timentin

Comments: \_\_\_\_\_

---

In order to maximize the fertility on this stallion we are following the suggested extension protocols as established by Texas A&M University:

- a. 25 million sperm per extended milliliter
- b. 750 million total sperm per dose extended at a minimum of 5:1

For best results with this stallion, target insemination of your mare +/- 12 hours post ovulation. Thank you for your patronage.

Sincerely,

Farm Name
