Foam & Rinse Chemical Dilution Control System

The **ProFoam 2** hose end foam gun offers automatic dilution with convenient control of where and how **ProVetLogic** concentrated cleaning solutions are applied. Application of diluted solutions with the **ProFoam 2** hose-end proportioner is easy. On and off functions are finger-tip controlled using a trigger on the spray nozzle. To rinse, the concentrate container is disconnected using an easy-to-operate quick coupler. This range of control **helps animal care personnel apply the solution only where it's needed.**

For directions on use, please see ProFoam 2 Installation Guide packed in the ProFoam 2 shipping carton.
