Summer Eczema Oral Supplement

Q: Why is my horse itching?

A: Insect bites cause a hypersensitivity skin reaction creating itchy skin. You will see hives or see blood dripping from where bites occurred. The bites from culicoides gnats create the most itch response in horses. These pests are the size of the period at the end of this sentence.

Q: What else can I do to protect my horse's skin?

A: A strong fly spray should be used 2x day-morning and dusk. Bathes 3x/week help by removing crusts around bite areas and it removes the urine attraction that gnats love. If do SE powder + Fly spray 2x/day + bathes = success.

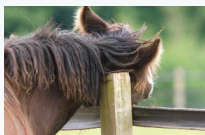

Q: Can I race/show/rodeo on summer eczema powder?

A: Yes legal in all competition. There is no withdrawal time. SE powder is all natural, drug-free, tastes great.

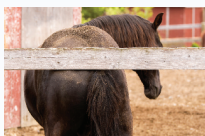

Summer Eczema Oral Supplement for:

itchy skin

damaged skin from excessive rubbing

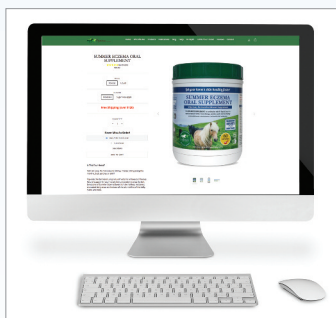

damaged tail hair from excessive rubbing
